

Post-Test Questionnaire (3–5 minutes)

Perception & Usability (Likert 1–7)

1. Overall, how easy was it to complete the documentation workflow? (1 = Very difficult, 7 = Very easy)
2. How confident did you feel that you could accurately distinguish AI-generated content from verified chart data? (1 = Not confident, 7 = Extremely confident)
3. The amber highlighting for AI-generated text was... (1 = Very unhelpful / confusing, 7 = Very helpful / clear)
4. How much did the transcript toggle help you verify the AI draft? (1 = Not at all, 7 = Extremely helpful)
5. The two-gate signing process (per-section Accept + final acknowledgments) made me feel... (1 = Much less confident / too restrictive, 7 = Much more confident / appropriate safeguard)

Open-Ended Reflections

1. What was the most positive aspect of this documentation workflow?
2. What felt confusing, frustrating, or could be improved? (especially around the AI features)

3. Would you trust signing a note that uses this AI draft system in real practice? Why or why not?
4. How does this compare to documentation experiences you've had in real EHRs (with or without AI)?
5. Any final thoughts or suggestions?
